# BEARDED IRIS

Can be planted any time before the ground freezes. Cover with light mulch to prevent heaving with the frost.

## CULTURAL DIRECTIONS

Plant Bearded Irises in the sunniest and best drained places in the garden. They require the moisture but will not do well in naturally wet soil. Do not use stable manure in soil intended for Bearded Iris.

Bearded Irises are shipped dry and should be planted as soon as received. Our plants will come properly trimmed and the roots pruned back ready

for planting. Should the tops be dried out and the roots appear shriveled when the plants are opened, no harm is done as the rhizomes will start new growth soon after they are planted.

Plant shallow so that the rhizomes, or fleshy part of the root lies in a horizontal position and is barely covered.

**Mother of Pearl and four others (all labeled) . . . \$1.00**

**This will give you a complete range of colors**

**Three Sets for \$2.50**

**100 Plants for \$10.00**

**LET US URGE YOU TO ORDER IRIS AT ONCE.**

They will winter better if given a chance to establish root system before freezing weather.

# PEONIES

While we have many Peony varieties in limited quantity, we are offering below only a select list of the best at moderate cost

## CULTURAL DIRECTIONS

Peonies should be planted in fertile, well-drained soil, and where they will get the full sun at least half the day. They will not do well in poorly drained ground, nor where water stands about their roots during any part of the year.

Any garden soil will grow good Peonies, but the more care that is given to preparing the ground where Peonies are to be planted, the better the blooms will be. Under no circumstances should fresh manure be used around Peonies.

Set the planting divisions in the prepared soil at a depth so that the new eyes, or buds, will not be over 2 inches below the surface of the ground after the loose soil and the roots have settled.

In cutting your Peony blooms, remember that the foliage is the lungs of the plant. If you value your roots, always leave at least two leaves remaining on each stem for the support of the root.

VARIETY	Price EACH	Price THREE

Walter Faxon—Soft coral pink, tinted salmon.....	3.00	7.50
Welcome Guest—Free blooming lilac pink.....	1.50	4.00

# TULIP BULBS

We quote on two sizes.

First size should be used for all indoor planting. Put them in pots and set in a cool dark place for three months. Then set them in a sunny window and they will produce fine flowers. Those preceded by an asterisk (\*) are best for indoor planting.

Second size will do well in your garden and cost you less.

Do not order less than 6 of a kind.

## SINGLE EARLY TULIPS

	Price per Dozen	
	1st Size	2nd Size
*Couleur Cardinal—Red .....	\$1.00	\$ .75
